Index to Volume 82

This index is in three parts: Title, Subject and Author.

Title index

160 years of science education: an uncertain link between theory and practice, (300), 41
A historical example of the use of the 'pinhole camera', (301), 103
A model internal combustion engine, (300), 127
A simple polypyrrole artificial muscle, (301), 85
A simple way to investigate natural indicators, (301), 95
Ammonia diffusion – a different demonstration, (300), 123
An improved 'triangle of forces' demonstration, (298), 105
Analogies generated by middle-school science students – types and usefulness, (299), 57
Another illustration of refraction, (299), 100
Assessment through reports of 'physics-in-action' visits, (301), 47
A view from Barbados, (300), 17; (301), 16

Bond energies: a few issues, (301), 94
Beyond 2000, (298), 12

Can they really mean what they said?, (299), 106
Chemical kinetics: common mistakes, misconceptions and fallacies, (301), 88
Chemical mapping for minerals on a microscale, (300), 125
Chemkin: new software for studying chemical kinetics, (301), 100
Children's understanding of scale – the use of microscopes, (301), 27
Concept-mapping activities to help students understand photosynthesis – and teachers understand students, (299), 11
Conserving tropical forest – volunteers join an international research project, (298), 33

Demonstrating hydrotropism in the roots of mustard or cress seedlings, (299), 95
Do children have a holistic view of their internal body maps? (299), 25
Double fertilisation, the endosperm and polyploidy, (298), 95

Elementary school science and the rise and rise of primary science, (300), 49
Enhancing the quality of argument in school science, (301), 63
Environmental games to teach concepts and issues, (298), 39
Erasing a singer using an operational amplifier, (300), 128

Feedback in questioning and marking: the science teacher's role in formative assessment, (301), 55
Friendship and debate: a century of promoting secondary school science, (300), 19

Halogen profiling – placing pupils in the 'driving seat' of learning, (299), 99
High-pressure food processing, (300), 115
How to learn science 'quickly, pleasantly and thoroughly': Comenian thoughts, (301), 79
Hypochlorite bleaches in the textile industry: a history, (299), 65

Ideas and evidence in science, (298), 13; (300), 18
Illustrating the radial electrostatic field of a charged sphere, (300), 126
Interactive environments, (299), 33
Introducing CASE methodology at Key stage 4: an example of bridging, (299), 47
Investigating the effect of light on silver halides on a microscale, (300), 124
Investigating the effects of temperature on the membrane integrity of yeast, (299), 91
Is the Earth spinning? Investigating the effect of location on Foucault's pendulum, (300), 119

Kinematics graphs and instant feedback, (299), 104

Metal-ligand bonds – are they really best described as dative covalent bonds? (298), 96
Modern physics, (298), 11

Numeracy in science: pupils' understanding of graphs, (299), 15

Physics on the Cut: motive power systems explored, (299), 102
Pollen germination across the seasons, (298), 93
Procedural understanding in biology: how is it characterised in texts? (298), 83
Pupils' and parents' views of the school science curriculum, (298), 23

Role-play in science teaching and learning, (298), 73

School science teaching as a profession: past, present and future, (300), 31
School textbooks and reading in science: looking back and forward, (300), 71
Science education, (300), 17
Science with attitude: the perennial issue of pupils' responses to science, (300), 59
Science, Technology and Society in school science education, (300), 83
Selecting curriculum content, (301), 14
Should controversial issues in science be taught through the humanities?, (300), 97
Some common biochemical mistakes, (301), 91
Studying air quality with data from the Internet, (298), 98

Taking 'STOCK' of pedagogical content knowledge in science education, (299), 81
Teaching for scientific literacy: what could it mean?, (300), 93
Teaching physics through finance, (301), 39
Thalidomide: myths shattered and new uses, (301), 93
The CASE for technicians, (300), 103
The CHARIS project: spiritual and moral development in science, (301), 71
The Earth's mantle is solid: teachers' misconceptions about the Earth and plate tectonics, (298), 57
The history of the Earth, (298), 102
The measurement of *g* as a means of introducing analysis of experimental data, (301), 97
The principle of hedonism, (300), 14
The teaching challenge: science, engineering and the knowledge economy, (301), 17

The visual environment in which secondary science is taught, (299), 73
Transferring knowledge from the classroom to the real world: redox concepts, (298), 65

Use of datalogging to overcome common misconceptions about Newton's First Law, (301), 106

Video-conference with NASA, (298), 10

What makes a good weed?, (299), 96
Which came first, the chicken or its egg? – an inquiry-based activity, (300), 109
Who were they? George Fowles (1882–1969), (299), 87
Writing for learning in science: producing a video script on light, (301), 33
Wrong answers welcome, (299), 41

Young people's views on the importance of conserving biodiversity, (298), 49

Subject index

acceleration
  free fall, (301), 97
air quality, (298), 98
ammonia, (300), 123
analysis
  computer, (301), 97
  error, (301), 97
  spreadsheet, (301), 97
anatomy, (299), 25
argument, (301), 63
artificial muscle, (301), 85
atomic structure, (299), 47
attitudes
  to science, (300), 59,
  parents, (298), 23
  pupils, (298), 23

bioethics, (300), 97
bleaches – hypochlorite, (299), 65
bonds,
  double, (301), 94
  energies, (301), 94
  metal ligand, (298), 96
  sigma and pi, (301), 94

CASE, *see* Cognitive Acceleration in Science Education
Charis project, (301), 71
Chemkin, (301), 100
chromatography, (299), 92
Cognitive Acceleration in Science Education (CASE), (299), 47; (300), 103
colorimeter, (299), 92
conductivity, (299), 91, 92
conceptual change, (299), 81
constructivism, (299), 41
curriculum materials, (301), 71

datalogging, (301), 106
developments, (301), 93
diffusion, (300), 123
dyes, (299), 91
  Evans Blue (299), 91
  Janus Green, (299), 91
  Methylene Blue (299), 91
  Neutral Red (299), 91

Earthwatch, (298), 33
ecology, (299), 96
efficiency, (299), 102
environmental science, games, (298), 39
evaluation, (301), 71

fertilisation, angiosperm, (298), 95
field work, (299), 33; (298), 33
finance, (301), 39
food processing, (300), 115
forces, triangle of, (298), 105
formative assessment, (301), 55
Fowles, George, (299), 87

germination, pollen, (298), 93
graphs, (299), 15; (299), 104
gravity, (296), 99

halogens, (299), 99
hedonism, principle of, (300), 15; (301), 14
history of science, use of, (298), 13
hydrotropism, (299), 95

ICT, (299), 33
ideas and evidence, (298), 13; (300), 18
indicators, (301), 95
International Baccalaureate, (298), 13
Internet, use of, (298), 98
interpreting data, (299), 15

key stage 3, science, (301), 71
key stage 4, physics, (299), 47
kinetics, (301), 88

language, (299), 57
learning, (301) 33
  theory, (301), 79
literacy, (300), 93

metaphors
  and analogies (299), 57
  history of earth, (298), 102
microscale chemistry, (299), 123, 125
misconceptions, (299), 25; (299), 104; (301), 88
  Newton's First Law, (301), 106
  teachers, (298), 57
mistakes, (301) 91
modelling, (301), 79
  internal combustion engine, (300), 127
  physics, (301), 39
motion, (299), 102

National Curriculum, (300), 97; (301), 27

observation, (301), 79
optics, (301), 103

physics
  assessment, (301), 47
  modern, (298), 11
  Salters A-Level, (301), 85
  visits, (301), 47
pinhole camera, (301), 103
plate tectonics, teachers' understanding, (298), 57
polypyrrole, (301), 85
professionalism of science teachers, (300), 34
promoting secondary science, (300),19
public understanding of science, (300), 93

questioning, (299), 41; (301), 55

radial electrostatic field, (300), 126
redox, students' understanding of, (298), 65
refraction, (299), 100
role-play, (298), 73

scale, (301), 27
science classroom, (299), 73
science education, (298), 12; (300), 14, 17, 41
  change in s.e., (300), 28
science in society, (300), 83
scientific enquiry,
  activities, (300), 109
  in biology textbooks, (298), 83
secondary science (301), 27
SHAP, (301), 47
Snell's Law, (299), 100
software, (301), 100
spiritual and moral, (301), 71
subject knowledge, (299) 100

teacher training, (300), 31
teaching of controversial issues, (300), 97
textbooks, (300), 71
thalidomide, (301), 93

writing, (301), 33

Author index

Adey, P., (300), 41
Alexander, B., (299), 106
Alleyne-Cope, N. B., (300), 17
Auty, G., (300), 126

Barrow, J., (299), 106
Bennett, J., (300), 59
Black, K., (299), 106
Black, P., (301), 55
BouJaoude, S., (299), 57
Boulter, C., (301), 27
Bromley, G., (298), 39
Bush, R., (300), 128
Butler, K. G., (298), 93; (299), 95

Campbell, B., (301), 47
Capistrano, N., (299), 104
Chapman, B., (298), 12; (300), 15
Chia, T. C., (301), 106
Chia, Y. F., (301), 106
Collins, S., (298), 23; (300), 15
Cookson, W., (300), 119
Cros, D., (298), 65
Cuthbert, A. J., (299), 25

Delargey, M.J.N., (301), 79
Delpech, R., (299), 91
Donnelly, J. F., (300), 31
Dowling, P., (301), 17

Edington, P., (299), 106
Elliott, P., (299), 73
Erduran, S., (301), 63
Evans, C., (300), 18

Faux, D.A., (301), 39

Gelbman, M., (301), 97
Gott, R., (298), 83
Grace, M., (298), 49
Graham, B., (299), 33
Gunter, B., (300), 103

Hall, E. G., (300), 14; (301), 14
Hand, B., (301), 33
Harlen, W., (300), 49
Harrison, C., (301), 55
Hawcroft, D., (299), 96
Hearn, S., (301), 39
Henderson, P., (300), 124, 125
Heselden, R., (300), 123, (301), 85, 95
Hogarth, S., (301), 47

Illes, R., (299), 15

Jenkins, E., (299), 87, (300), 19
Jones, C., (298), 102
Jones, S., (298), 73

Kempton, T., (301), 71
Kinchin, I. M., (299), 11
King, C., (298), 57

Laing, G. B., (299), 100
Lenton, G., (299), 15
Levinson, R., (300), 97
Lorenzo, M., (301), 33
Lubben, F., (301), 47

MacInnes, I., (299), 100
Mallinson, R., (299), 106
Marsh, G., (301), 27
McGregor, D., (300),103
McSharry, G., (298), 73
Médimagh, M. S., (298), 65
Mihas, P., (301), 100, 103
Monk, M., (301), 63
Moran, J., (299), 47
Morley, R., (300), 123, (301), 85
Muge, C., (299), 102

Norbury, J., (300), 127

Oremus, Z., (299), 106
Osborne, J., (298), 23; (300), 15; (301), 63

Papageorgiou, G., (301), 100
Pardhan, H., (299), 81
Parkes, T., (301), 27
Parsons, B., (298), 98
Prain, V., (301), 33

Ratcliffe, M., (300), 83
Roberts, R., (298), 83

Salter, L., (298), 98
Schaschke, C., (300), 115
Selley, N., (299), 41
Selvaratnam, P., (300), 17; (301), 16
Severs, P., (300), 124, 125
Sharp, J., (298), 49
Shelley, S., (299), 106
Sicam, A., (299), 104
Simon, S., (300), 49, (301), 63
Sivade, A., (298), 65
Solomon, J., (300), 93
Soudani, M., (298), 65
Stevens, B., (299), 15
Swain, P. A., (299), 65

Talbot, C., (298), 13, 95; (300), 18; (301), 88, 91, 93, 94
Tamim, R., (299), 57
Thomas, P., (298), 105
Trumper, R., (301), 97
Turner, M., (298), 96
